STANDARD FOLDS

› Custom shapes and folds are available upon request.

General Specifications

SPECIFICATIONS

- Quick installation.
- Non-combustible panels.
- Durable and fully recyclable once it reaches the end of its useful life.
- Eco-friendly (solvent free) powder coating providing more stable and resistant colours over time.

PERFORMANCE CRITERIA

- Maximum perimeter extrusion deflection under service loads is limited to $L/180$.
- Maximum panel deflection under service loads is limited to $L/60$.

MATERIAL

- 5000 series aluminum panel, 3.2 mm (0.125") thick.
- 6000 series aluminum perimeter extrusions, 3.2 mm (0.125") thick.

FINISH/COLOUR

- Electrostatic powder coating in accordance with AAMA 2604, and 2605 standards.
- Colour at the customer's choice.

USAGE

- Outdoor use as exterior wall siding.*†
- Indoor use as decorative panels.

*To use these panels in a rainscreen system, the backing wall must be designed according to local building codes and standards in force by a competent building envelope professional.
† For buildings of 20 m (65'-6") or less in height with static wind pressures of 1.25 kPa (26 psf) or less. For buildings taller than 20m, an engineer must approve the strength of the panel substructure.
For any other application, contact Maibec's technical service.

Technical Specifications

DIMENSIONS

- Rectangular panels between 114.3 mm x 304.8 mm (4.5" x 12") and 1473.2 mm x 3606.8 mm (58" x 142").
- Square panels between 152.4 mm x 152.4 mm (6" x 6") and 1473.2 mm x 1473.2 mm (58" x 58").
- Relief: 25.4 mm (1").
- Joints: 22.2 mm (0.875").

TOLERANCES

- ± 1.6 mm (± 0.063 ") for extrusion positioning.
- ± 0.2 mm (± 0.008 ") for panel dimensions.
- At most, deviations of 1/1000 over gross dimensions when squaring extrusions.

INSTALLATION

- The installer is responsible for sizing perimeter supports and their fasteners.
- He is also responsible for choosing minimum spacing and sizing of the panel fasteners.
