Metallic paint finishes are directional in nature. In order to ensure consistency of shade and colour, all metallic material for a project should be ordered at the same time to ensure that it is all produced from the same paint batch.

Les finis de peinture métallisés sont de nature directionnelle. Afin de garantir l'uniformité de la teinte et de la couleur, tous les matériaux métalliques d'un même projet doivent être commandés en même temps afin de garantir qu'ils sont tous produits à partir du même lot de peinture.
